

# APRIL 17<sup>th</sup>

## On this day in...

**2004:** On this day measurable rain fell in San Diego for the last time until 10/17, a streak of 182 consecutive days with no measurable rain, the longest streak on record. Several funnel clouds were spotted off San Clemente.

**2000:** A storm that started on this day and ended on 4/18 brought up to two inches of rainfall to lower elevations and 18 inches of snow to Wrightwood. Winds gusted to 68 mph in the mountains of San Diego County.

**1983:** Heavy rain that started on this day and ended on 4/20 caused street flooding and mud slides.

**1963:** Ten inches of snow fell in Palomar Mountain, the greatest daily snowfall on record for April. This also occurred on 4/11/1967.

These funnel clouds were seen off the coast of San Clemente on this day in 2004.
